

NAE Defense

GCC AMMUNITION

SMALL CALIBER / MEDIUM CALIBER / PROGRAM SUPPORT

MISSION-READY SUPPLY SOLUTIONS

NAE Defense connects GCC defense and security customers with ammunition sourcing, program coordination, and delivery support tailored to the requirement.

NAE DEFENSE

A focused route from requirement to supply

NAE Defense coordinates ammunition inquiries for defense and security programs across the Gulf Cooperation Council region.

PROGRAM WORKFLOW

01

DEFINE

End user, caliber, quantity and use

02

QUALIFY

Specifications and source review

03

OFFER

Commercial and delivery terms

04

DELIVER

Documentation and coordination

A

Product scope

Match the requested family and configuration to the end user's platform and mission.

B

Source review

Confirm manufacturer, qualification, production capacity, and available documentation.

C

Execution

Coordinate inquiry, offer, schedule, logistics, and post-award support.

BUILT AROUND CUSTOMER REQUIREMENTS

Military and security procurement begins with a precise technical requirement. NAE Defense can organize the requested product family, specification, packaging, delivery destination, inspection expectations, and support needs into a clear supplier inquiry.

TRAINING + OPERATIONAL NEEDS

Small caliber families

The following categories provide a starting point for customer inquiries. Specific variants and sources are confirmed for each program.

SERVICE / TRAINING / PRECISION / SPECIAL APPLICATIONS

01

9 x 19 mm / 300 BLK

Pistol and carbine families for service and training requirements.

02

5.56 x 45 mm

Rifle ammunition family; define ball, training, or other requested configuration.

03

7.62 mm families

7.62 x 39 mm, 7.62 x 51 mm, and 7.62 x 54 mm for platform-specific inquiries.

04

12.7 mm families

Heavy machine-gun and specialized applications subject to platform fit and source.

Illustrative ammunition image. Configuration, qualification and availability to be confirmed.

PLATFORM-SPECIFIC SUPPLY

Medium caliber inquiries

NAE Defense can help structure inquiries for military platform ammunition by caliber, configuration, technical standard, and delivery program.

CONFIRM PLATFORM / SPECIFICATION / QUALIFICATION

CALIBER FAMILIES TO DISCUSS

20 x 102 mm

20 x 128 mm

30 x 113 mm

30 x 173 mm

40 x 53 mm

A

Training configuration

Define practice, marking, tracer, or other training needs against the approved platform.

B

Operational configuration

Specify exact item, performance standard, acceptance criteria, and end use for review.

Illustrative ammunition image. No configuration or supply commitment is implied.

BEYOND A LINE ITEM

What a complete inquiry includes

A clear requirement lets the sourcing and technical teams assess fit, availability, and delivery risk early.

01

Technical definition

Caliber, exact designation, platform compatibility, applicable standard, and approved substitutions.

02

Quantity + schedule

Initial quantity, annual demand, delivery phasing, destination, and urgency.

03

Quality evidence

Qualification status, test reports, lot traceability, inspection and acceptance requirements.

04

Logistics + terms

Packaging, markings, shipment route, Incoterms, warranty, and post-delivery support.

POTENTIAL GCC WORKSTREAMS

SUPPLY

Product sourcing for defined defense and security requirements.

INDUSTRY

Explore lawful local industrial cooperation with the selected manufacturer.

SUSTAIN

Plan recurring demand, documentation, and lifecycle coordination.

All offers depend on manufacturer confirmation, customer and end-use review, and applicable export and import approvals.

A CLEAR REQUIREMENT. A CREDIBLE OFFER.

NAE Defense is ready to discuss ammunition sourcing and program support for qualified GCC defense and security customers.

NAE DEFENSE | GCC ENGAGEMENT

Start the discussion

Send the end user, product designation, quantity, delivery target, technical standard, and destination. We will coordinate the appropriate supplier and program review.

GCC PROGRAM INQUIRIES
